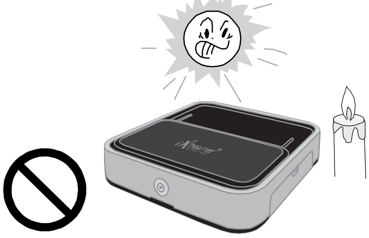
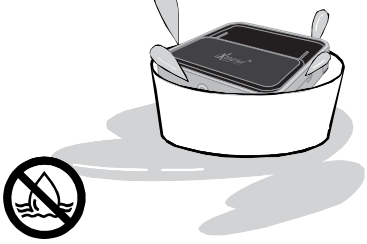
Do not install product under direct sunlight or near objects of heat, such as lit candle, cigarette or fire, etc.



Do not place product in water. (This may cause breakdown of product or electric shock.)



# Introduction

Congratulations on your purchase of the iXtreamer Media Player, a state-of-the-art consumer electronic device that will enhance and enrich your home multimedia experience.

The iXtreamer hybrid media player is based on the same successful platform as the models we introduced in 2010 which allow you to stream HD (MKV H.264) movies or user-generated videos, listen to high-quality digital music and show high-resolution slideshows of your family photos on your TV. The iXtreamer is equipped with 1 normal size 3.5" HDD capacity of up to 3TB storage, double memory and iPhone\iPad dock that will allow you to enjoy your iTunes collection on TV.

With the iXtreamer we are opening a new dimension to Media Players by connecting them to the wonderful world of Apple devices.

Due to the rapid development of our product we cannot possibly guarantee that this Guide will include all its features. So if you have questions please feel free to browse the Xtreamer Knowledge base or contact our staff.
Please make sure to visit our site www.xtreamer.net for the Xtreamer news, official announcements and firmware upgrade.

# About the Product

## Multimedia library

High Resolution HD-level File Play: iXtreamer supports the maximum of 1920X1080 progressive scan to provide clear and high resolution picture quality.

## Supporting Diverse Movie Format Types

iXtreamer supports a variety of HD files, such as TP, TS ,TRP and M2T,M2TS.MTS files, but also MPEG1/2/4 , Divx (3/4/5/6), Xvid, DAT, ISO, DVD (VOB, IFO) and MKV(X.264), AVC HD, WMV9, ASF, H.264,MOV,MP4, RMVB, FLV, etc. You can conveniently enjoy watching movies anywhere as long as you have access to a display device, such as TV, etc.

## Convenient Copy

iXtreamer allows you to copy a media file from and to a network-connected computer.
Also, you can copy files by high-speed USB from a PC to iXtreamer HDD or to a USB storage device connected to iXtreamer.

## Supporting Diverse Music Files

iXtreamer supports a variety of music sources, such as AAC,MPEG audio MP1/2/3/A, WMV,WMA,FLAC,OGG, AC3 and DTS, etc. The player’s fast forward and rewind functions allow you quickly navigate through your files.

## Digital Photo Album

iXtreamer supports the upgraded JPEG and BMP image files. The entire family can enjoying watching the files on your TV screen. Vertically photographed files can be rotated without requiring any modification.

## Network-shared File Play

Files shared on your home network can be played through wired or wireless connection without having to move them to the iXtreamer hard disk.

## NAS (Network Attached Storage)

iXtreamer can be used as a the network drive in Window with full SAMBA support

## Supporting USB Host

iXtreamer supports 2 USB2.0 hosts. By connecting USB external storage devices, you can easily add additional storage to the iXtreamer and play the files on the external USB devices. A USB type memory card reader can also be used.

## Supporting UPnP client

iXtreamer supports UPnP server functions. iXtreamer supports free DDNS so that you can connect to the internal HDD of the Xtreamer not only from your local PC, but also from any PC with a Internet connection. This function can also be used from an external device that supports UPnP client.

# About the Product

## Supporting High Resolution HDMI

Built-in HDMI terminal for digital signal output enables you to enjoy video content with better picture quality.

## 5.1CH Audio Output and Down Mix Function

iXtreamer provides 5.1CH Dolby Digital audio and DTS, etc. It can also downmix audio streams to 2 channels to play on a TV without requiring an additional decoding device, such as an amplifier (optical).

## Supporting free DDNS

iXtreamer provides 1 DDNS (Yourname.myxtreamer.net) to connect UPNP free Web Server that allows you to connect to your player from all over the world.

## Supporting real-time YouTube access

With iXtreamer you can search and play videos from YouTube without downloading them, find your favorite YouTube channels, playlists etc.

## Internet

Access Xtreamering section on the Main Menu to get access to hundreds of Internet streams and online channels as well as many Xtreamer community projects bringing you a variety of amazing online content and unique applications.

## Internet Radio

Enjoy a vast variety of styles and genres with our Internet-radio feature. Easily add any number of your favorite stations.

## Easy access to your favorite files

Add any file or folder to your Favorites for easy access via the Main-menu and create playlists that can be automatically run after startup.

## iPhone\iPod\iPad dock

iXtreamer has a truly unique ability to play all the media files stored on your iPod\iPhone\iPad on a TV or audio-system as well as charge your Apple device or upgrade its firmware.

## iPhone\iPod\iPad control

You can control your Xtreamer via iPod or any phone capable of connecting to your home network with a custom remote control application

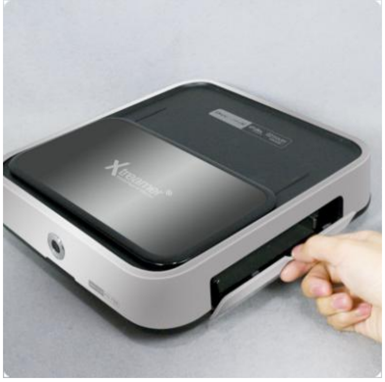
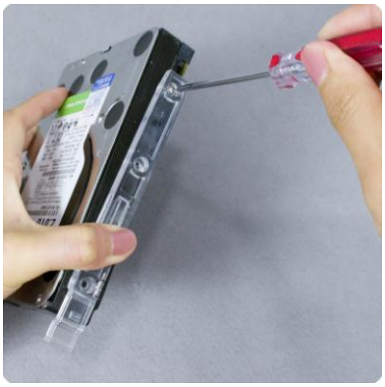
Specifications subject to change without prior notice

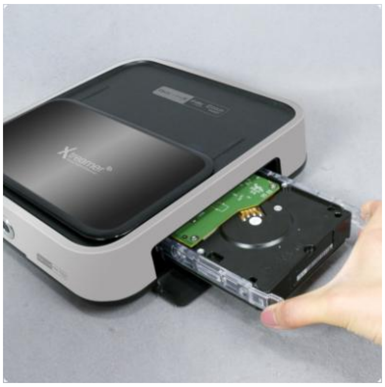
# Hard-Disk Installation



**01.** Open the hard disk cover



**02.** Connect the HDD guard to a SATA HDD as shown on the picture. Fasten the screws.



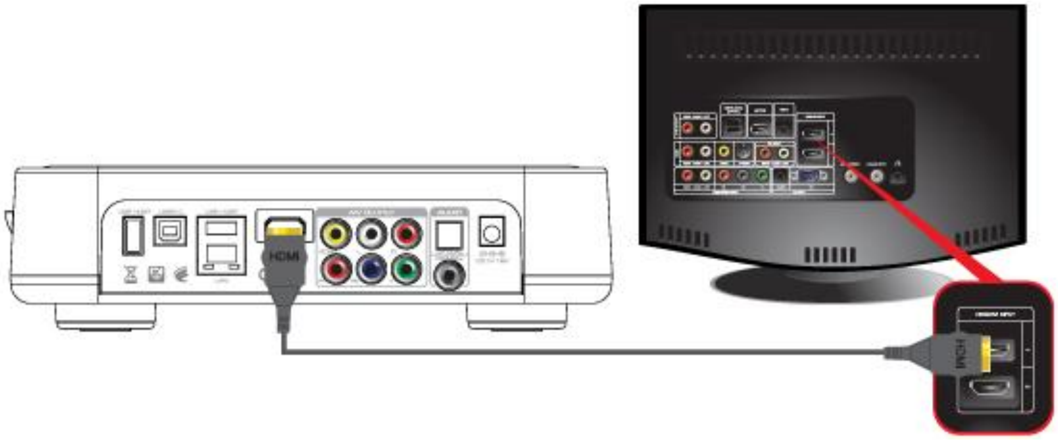
**03.** As shown here, slowly and carefully push the HDD guard together with the SATA HDD into the main body of iXtreamer

**04.** Close the hard disk cover.

# Connections

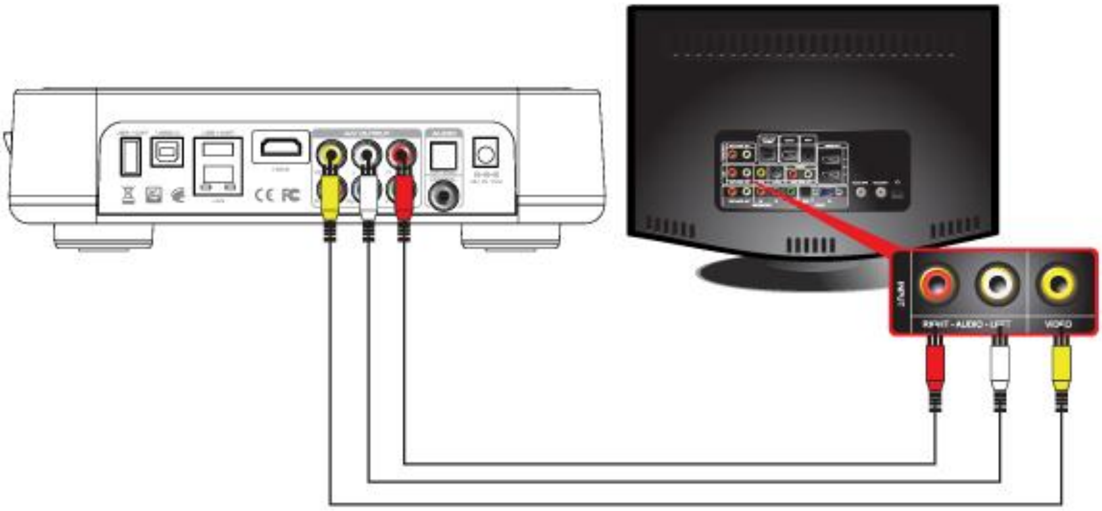
## Video & Audio Output Connections

- **HDMI cable connection**



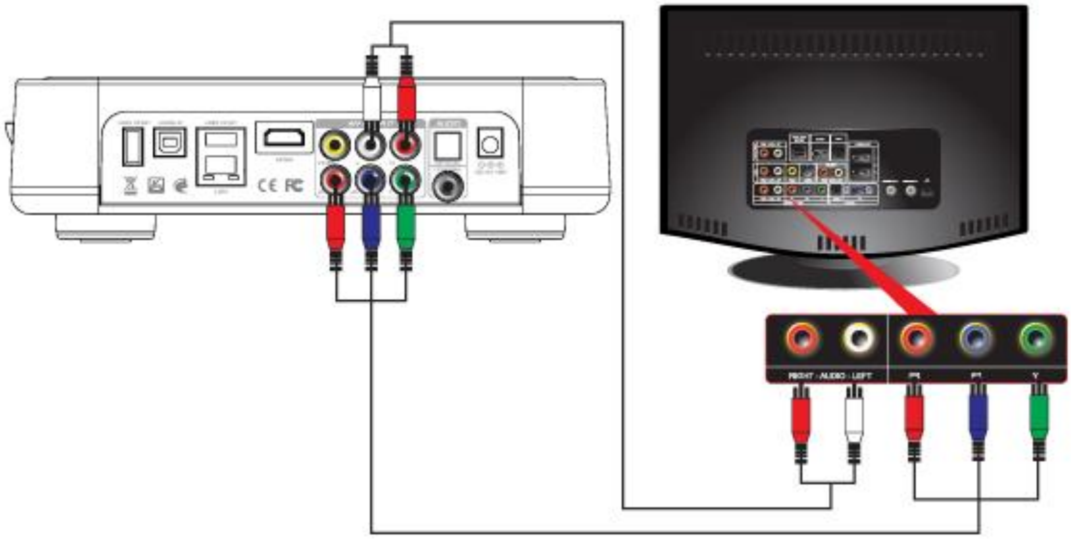
Connect HDMI cable to HDMI terminal at the back of product. Connect the remaining cable terminal to HDMI terminal at the back of a digital TV. Make sure to carefully distinguish between input and output terminals.

- **Composite cable connection**



Connect yellow cable for video signal to the terminal located at the back of side of TV. Then, select external input of TV. Connect the remaining red and white terminal cables to the left/ right and audio output terminal at the back of the device. Then, connect red and white cables to the left/ right terminal of DTV input or component audio input located at the back of a digital TV.

### ・Component cable connection



Connect the green, blue and red terminal cables to the iXtreamer and TV in accordance with the color scheme; connect white AV cable to L terminal, and red AV cable to R terminal. (Component cable is an optional item)

## HDD format on PC

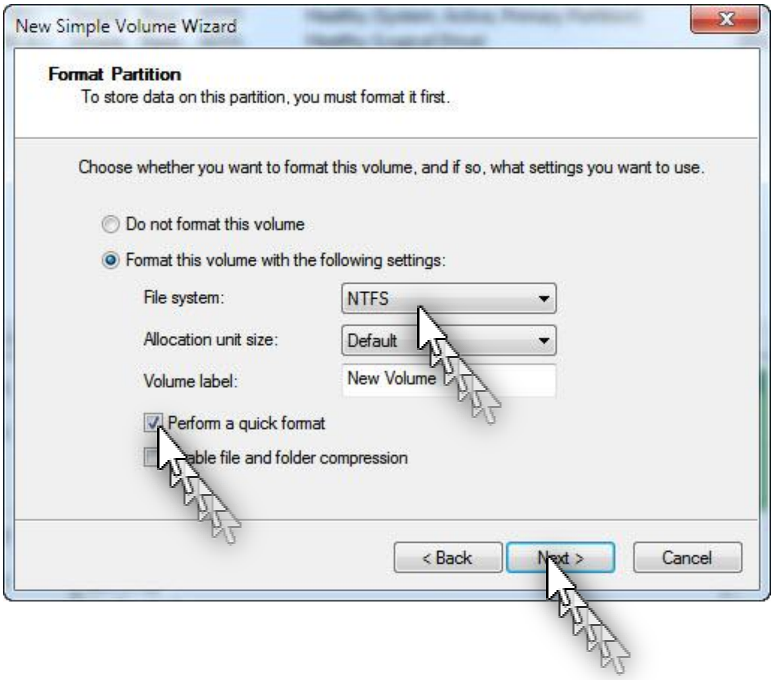
10. Select the NTFS  File System and check the Perform a Quick Format.
    Click Next button.



New Simple Volume Wizard

**Format Partition**

To store data on this partition, you must format it first.

Choose whether you want to format this volume, and if so, what settings you want to use.

○ Do not format this volume

● Format this volume with the following settings:

File system: NTFS

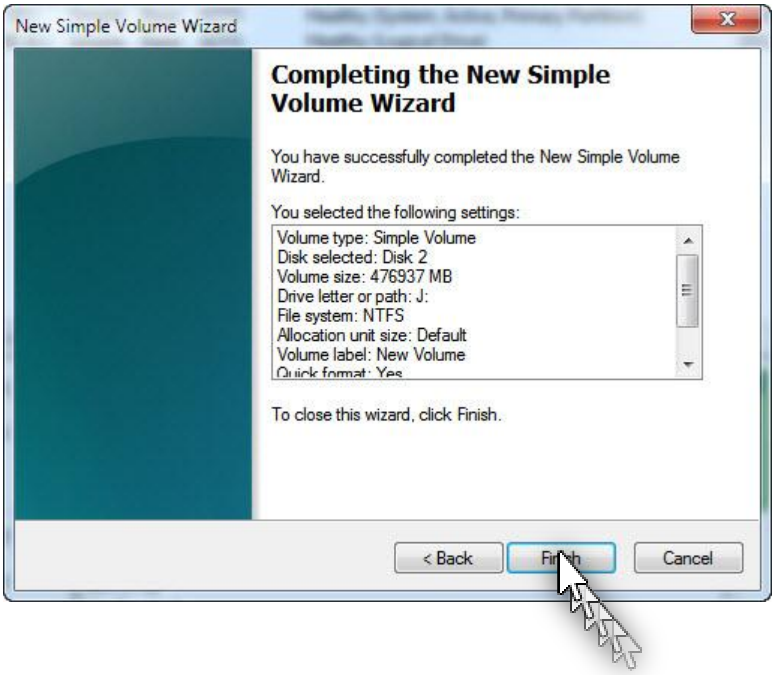
Allocation unit size: Default

Volume label: New Volume

☑ Perform a quick format

☐ Enable file and folder compression

11. Click Finish button and then start format.
    Please wait until the process is complete.



New Simple Volume Wizard

**Completing the New Simple Volume Wizard**

You have successfully completed the New Simple Volume Wizard.

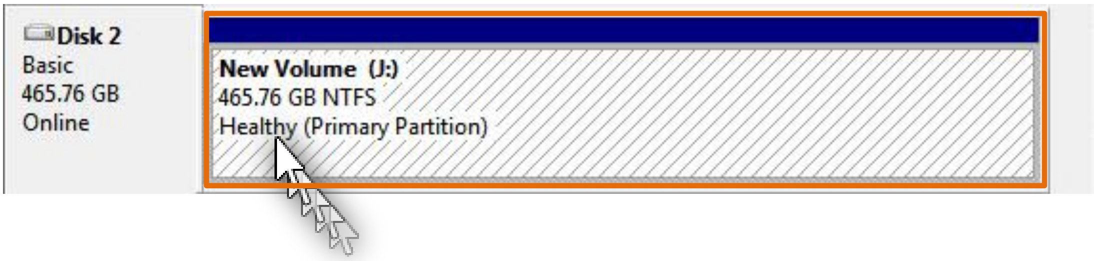
You selected the following settings:

Volume type: Simple Volume
Disk selected: Disk 2
Volume size: 476937 MB
Drive letter or path: J:
File system: NTFS
Allocation unit size: Default
Volume label: New Volume
Quick format: Yes

To close this wizard, click Finish.

## HDD format on PC

12. After the process is complete you will see the capacity and hard disk state as shown below.

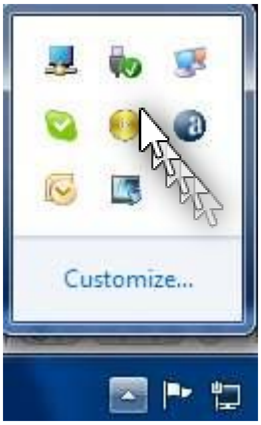


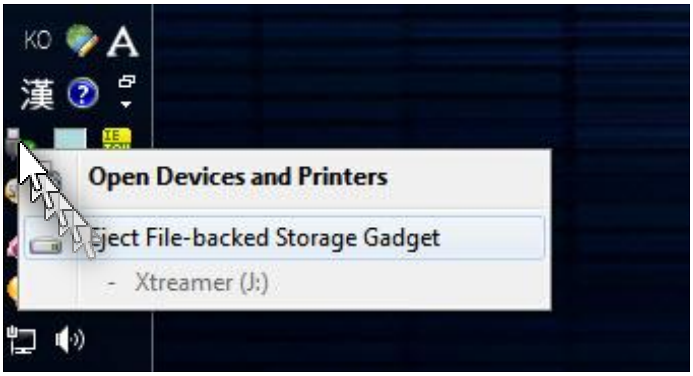
Disk 2
Basic
465.76 GB
Online

New Volume (J:)
465.76 GB NTFS
Healthy (Primary Partition)

13. Complete hard disk format.
Copy the media files on your internal hard drive.

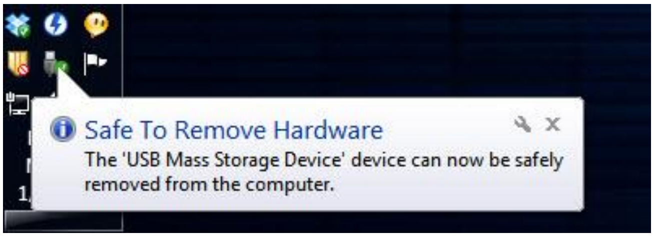
14. Use "Safely Remove Hardware" utility before disconnecting the USB cable to avoid loosing data.





KO
Open Devices and Printers
Eject File-backed Storage Gadget
- Xtreamer (J:)

Click the icon on desk bar, click the Eject disk (Safe to remove).



Safe To Remove Hardware
The 'USB Mass Storage Device' device can now be safely removed from the computer.

Disconnect USB cable.

# Settings

## Initial setting

### 1. Adjusting output mode with TV output and Video output

1. Automatically adjust the TV output mode when connected via HDMI cable.
   Cycle through available resolutions.

   Remote Control Key: TVOUT 9 // Press 2 times consecutively

2. . Connect Component / Composite cable
   Please note that video might suffer when connected via analogue.

   Remote Control Key: TVOUT 9 // Press 2 times consecutively

Different regions use different output standards:

-- PAL(B) : HDMI Auto, 576P 50Hz, 720P 50Hz, 1080i 50Hz, 1080P 50Hz
Europe, South Africa, Middle East, China, Austria, India

-- NTSC : HDMI Auto, 480P 60Hz, 720P 60Hz, 1080i 60Hz, 1080P 60Hz
Korea, Japan, US, Canada, Taiwan, Philippines, Colombia

### 2. Select OSD language menu (default : English)

Select the OSD language.
Setting → System → Menu Language → Select

### 3. Select subtitle\ID3-Tag encoding(default : Unicode(UTF8) )

Select the subtitle code.
Setting → Playback → Subtitle / ID3-tag → Select.

### 4. Select Audio Output. (default : DTS / Dolby D 2.1CH)

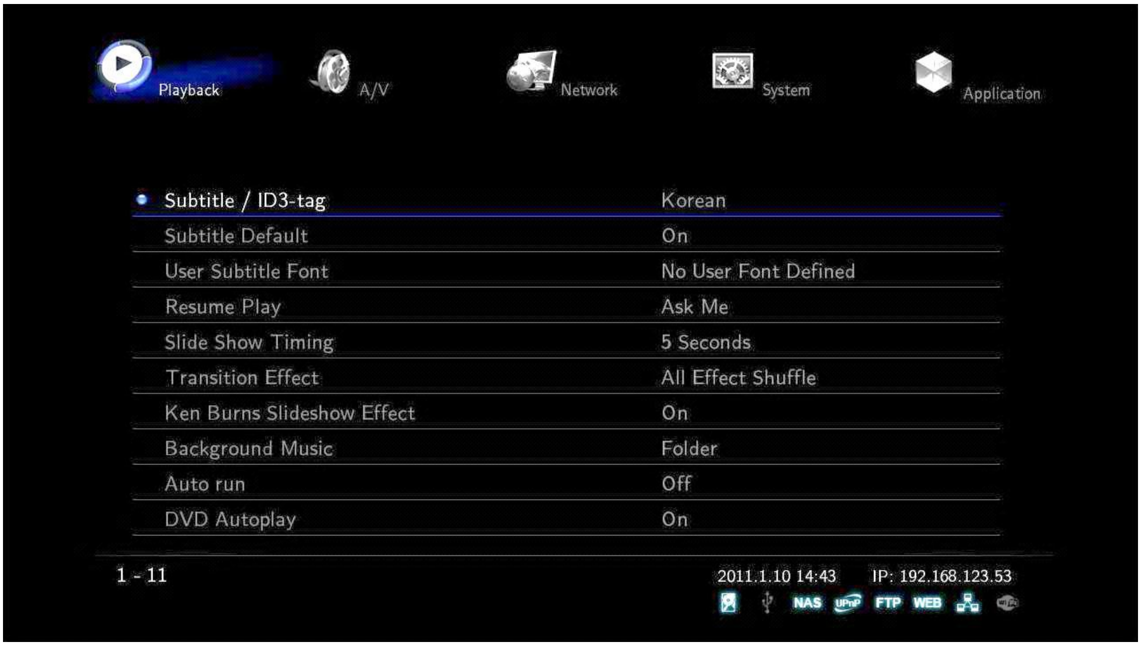
Select the audio setting as your audio system.

**Use Only TV (Downmixing)**
Setting → A/V → Digital Output → DTS / Dolby D 2.1CH)

**Using amplifiers (Pass Through)**
Setting → A/V → Digital Output → DTS / Dolby TrueHD/Dolby D+

# Settings

## Playback



Subtitle / ID3-tag Korean
Subtitle Default On
User Subtitle Font No User Font Defined
Resume Play Ask Me
Slide Show Timing 5 Seconds
Transition Effect All Effect Shuffle
Ken Burns Slideshow Effect On
Background Music Folder
Auto run Off
DVD Autoplay On

1 - 11
2011.1.10 14:43 IP: 192.168.123.53

### Subtitle / ID3-Tag

You can specify the language used in subtitle files and ID3-tag in Mp3 files. Unicode [UTF-8] is an industry standard, and is set as default . If you are not using Unicode encoded files, select your preferred language.

Example: [Setting] – [Playback] – [Subtitle/ID3-tag] – [Thai].

### Subtitle Default

| | |
|---|---|
| **ON** | If the name of video file and subtitle file are identical subtitles will be displayed automatically. |
| **OFF** | Subtitles are not displayed. |

### User Subtitle Font

TTF font allows you to combine multiple fonts into a file used for defining characters design. To use custom fonts you need to save them on an internal HDD or USB Storage device: “User font” folder is automatically created and you will be able to store several TTF font files in that folder.
Selecting and changing fonts is also supported during playback. Select [Setting] – [Playback] – [User Subtitle Font]. ※ Depending on fonts, you may not be able to change font designs.

### Resume Play

You can begin playing Xtreamer from the point where you previously stopped it. Your system saves a record of the scene that was playing when you stopped playback so it knows where to resume playing.

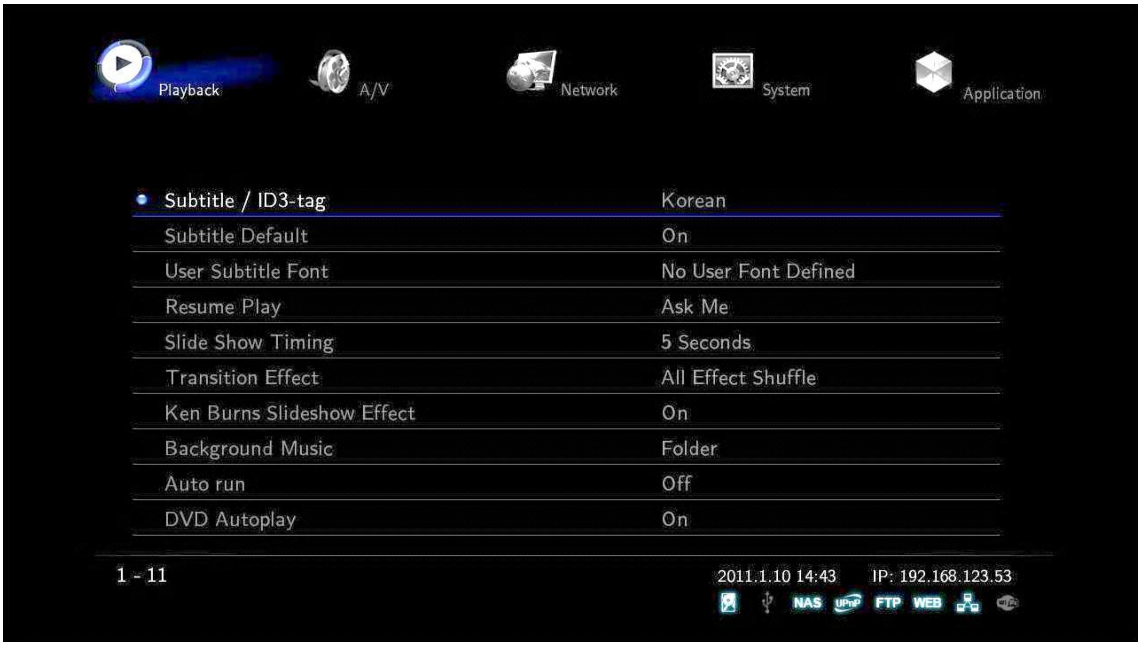
| | |
|---|---|
| **NEVER** | Do not resume playback. (Do not use Recently watched list) |
| **ASK ME** | Pop up the message of asked resume playback. |
| **ALWAYS** | Start the resume playback. |

### Slide Show Time

This feature is used to set the time intervals for changing images during a slideshow.
You will be able to select the time transitions:
[Off / 2 Seconds / 5 Seconds / 10 Seconds / 30 Seconds / 1 Minute / 2 Minutes]

# Settings

## Playback



| | |
|---|---|
| Subtitle / ID3-tag | Korean |
| Subtitle Default | On |
| User Subtitle Font | No User Font Defined |
| Resume Play | Ask Me |
| Slide Show Timing | 5 Seconds |
| Transition Effect | All Effect Shuffle |
| Ken Burns Slideshow Effect | On |
| Background Music | Folder |
| Auto run | Off |
| DVD Autoplay | On |

1 - 11

2011.1.10 14:43 IP: 192.168.123.53

### Transition Effect

The feature is used to display a range of digital photos, and its application includes 7 major functions.
[All Effect Shuffle] is set as a default value.

### Ken Burns Sideshow Effect

The feature enables used technique of embedding still photographs in motion pictures, and displays zooming effects.

### Background Music

Background music is played while running photo slideshow.

| | |
|---|---|
| **OFF** | Turning off the background music. |
| **Folder** | You will enjoy playing the entire content of music folder while your focus is on its inside photos of the same folder. |
| **Playlist** | Music files will be played, select [Media Library] – [Playlist]. There can be several new variations on slideshow like using your captioned photos and music. |

### DVD Autoplay

The feature allows you to select automatic DVD play mode when inserting a DVD disk into the DVD ROM connected to your player via USB port

| | |
|---|---|
| **OFF** | DVD Disk isn't automatically played. |
| **ON** | DDVD Disk is automatically played. |

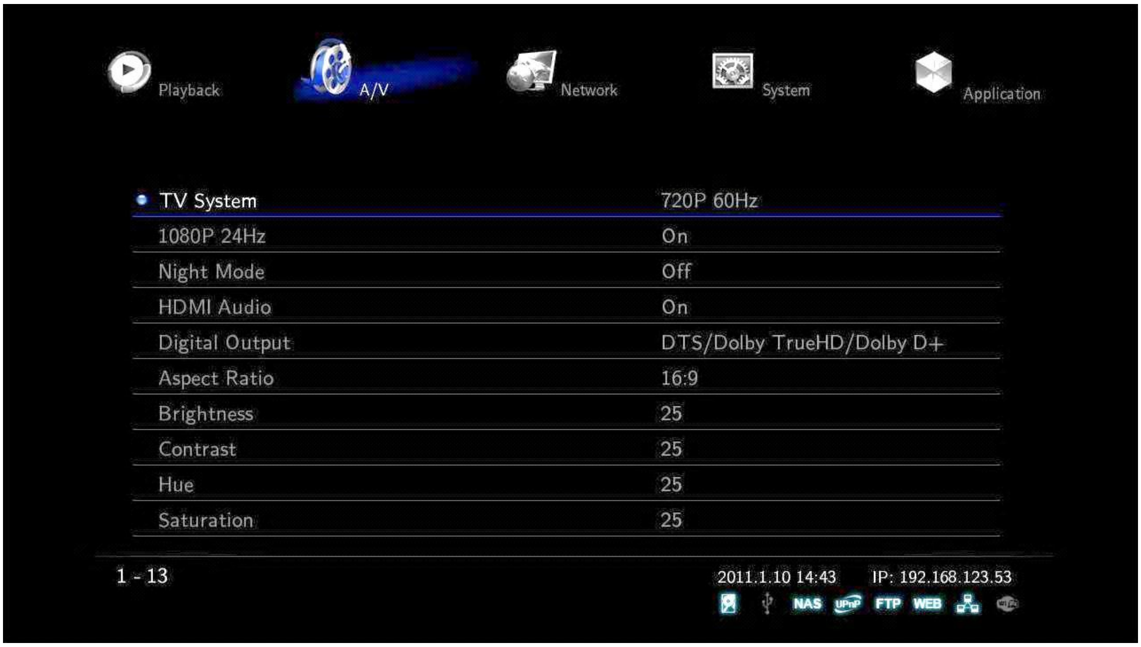
### Auto Run - need an internal HDD to use this feature

This feature allows you to automatically play a designated playlist when Xtreamer starts.
Auto-Run function detects and plays a Playlist and also enables you to organize your playlists via the Xtreamer Web Server. [Off / Music Playlist (Sequence) / Music Playlist (Shuffle) / Photo Playlist (Sequence) / Photo Playlist (Shuffle) / Movie Playlist (Sequence) / Movie Playlist (Shuffle)]

**Note :** Add your file lists to Playlist by selecting [Media Library] – Type [Music/Photos/Movies] in order to use this feature. Added Playlist from [All] mode won't be played by the Auto Run feature.

# Settings

## A/V



| | |
|---|---|
| TV System | 720P 60Hz |
| 1080P 24Hz | On |
| Night Mode | Off |
| HDMI Audio | On |
| Digital Output | DTS/Dolby TrueHD/Dolby D+ |
| Aspect Ratio | 16:9 |
| Brightness | 25 |
| Contrast | 25 |
| Hue | 25 |
| Saturation | 25 |

1 - 13

2011.1.10 14:43 IP: 192.168.123.53

### TV System

You will be able to select proper display resolution and video output type.

| | |
|---|---|
| **PAL (B) (50Hz)** | Europe, Greenland, South Africa, the Middle East, China, Austria, India, Indonesia. |
| **NTSC (60Hz)** | Korea, the USA, Japan, Canada, Taiwan, the Philippines, Colombia. |
| **Display Resolution** | HDMI Auto / NTSC / PAL / 480P / 576P / 720P 50Hz / 720P 60Hz / 1080i 50Hz / 1080i 60Hz / 1080P 50Hz / 1080P Supported.<br>※ In some cases, display resolution on your TV can not be supported due to inactivity; therefore, you should check your TV specification. |

### 1080P 24Hz

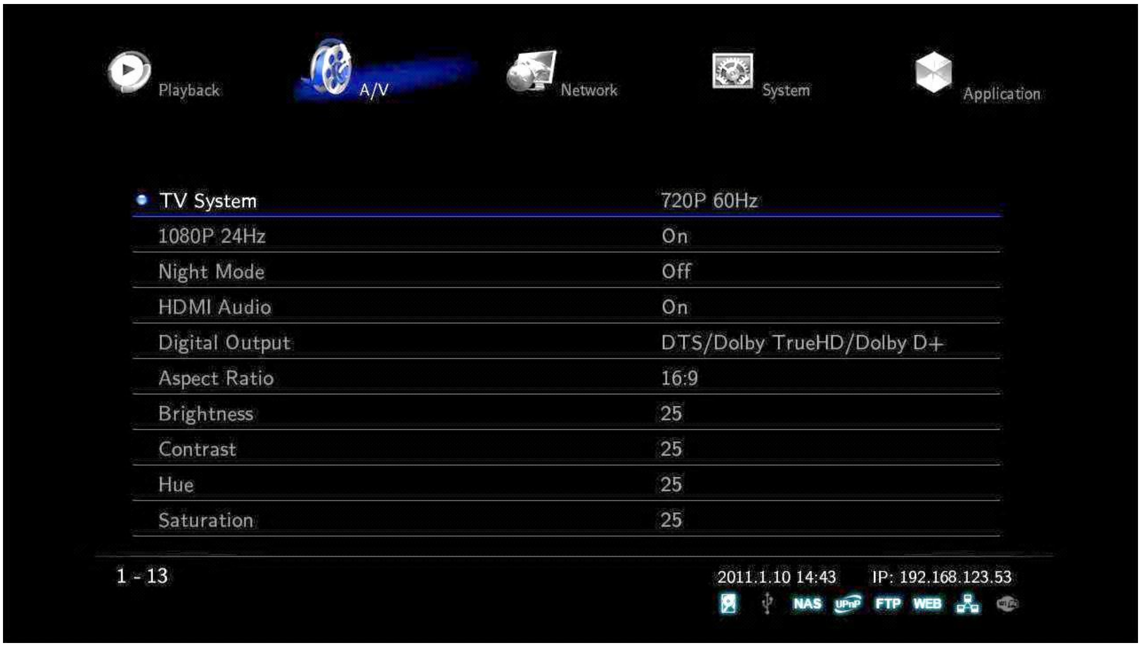
This feature allows you 1080P 24Hz output when playing Blu-ray files (BD); however, this function is only available when iXtreamer is connected using a HDMI cable to a TV that supports 24Hz frame rate.

| | |
|---|---|
| ON | This function will be enabled when FPS of media playback file and 1080P resolution output are the rates of 23.976 frame /s.<br>BD file is recorded by an original film frame rate of 24 frame /s, and then outputted to 1080p/24Hz. |
| OFF | 1080P 24Hz output is off |

**Note for 1080p 24p**

- TV, AV amp and media file you use must support 1080P 24Hz and your media file should be encoded 1080P 23.976fps.
- If video isn't properly played by selecting [ON], you will be required to select [Off].
- The initial TV screen can be flickering when you switch on "1080P 24Hz" mode

## A/V



| | |
|---|---|
| TV System | 720P 60Hz |
| 1080P 24Hz | On |
| Night Mode | Off |
| HDMI Audio | On |
| Digital Output | DTS/Dolby TrueHD/Dolby D+ |
| Aspect Ratio | 16:9 |
| Brightness | 25 |
| Contrast | 25 |
| Hue | 25 |
| Saturation | 25 |

1 - 13

2011.1.10 14:43 IP: 192.168.123.53

### Night Mode

| | |
|---|---|
| **Off** | Outputting raw sound. |
| **On** | It provides high-definition audio that is identical to, and every bit as spectacular as, the master recording. In spite of decreasing volume, you will be able to experience incredible surround sound that puts you right in the middle of the action without disturbing others. |
| **Comfort** | You will be able to hear every tiny sound in rich detail as well as comfortable sound levels solely for you. |

### HDMI Audio

It enables you to turn on (or off) HD Audio through HDMI connection.

| | |
|---|---|
| **Off** | Both video and audio is outputted via HDMI. |
| **On** | No audio is outputted via HDMI connection |

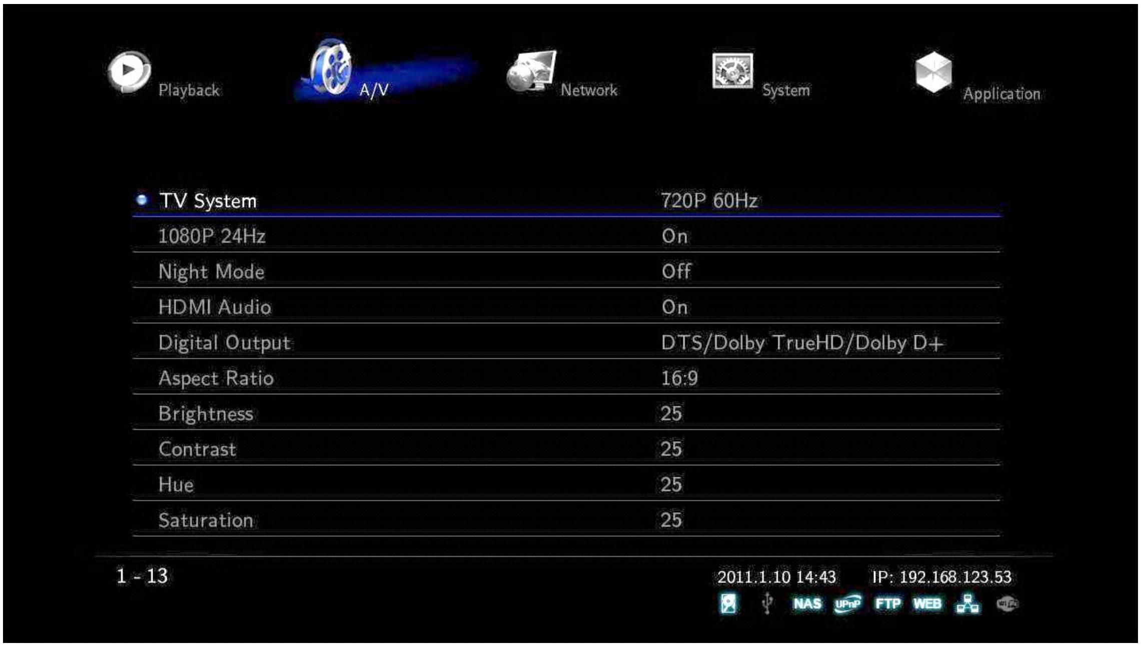
### Digital Output

Select between Digital and Analog Output Type.

| | |
|---|---|
| **DTS / AC3 5.1CH (Passthough)** | Enables 5.1ch surround sound with optical connection when you wish to use multi-channel speaker. |
| **DTS / AC3 2.1CH (Downmix)** | All audio is downmixed to output 2.1ch stereo sound when TV or 2ch Speaker used. |
| **ACC/FLAC/OGG 5.1CH PCM(HDMI)** | It outputs 5.1ch surround sound created by ACC/FLAC/OGG, and supports multi channel output with only HDMI connection. |

# Settings

## A/V



| | |
|---|---|
| TV System | 720P 60Hz |
| 1080P 24Hz | On |
| Night Mode | Off |
| HDMI Audio | On |
| Digital Output | DTS/Dolby TrueHD/Dolby D+ |
| Aspect Ratio | 16:9 |
| Brightness | 25 |
| Contrast | 25 |
| Hue | 25 |
| Saturation | 25 |

1 - 13

2011.1.10 14:43 IP: 192.168.123.53

### Aspect Ratio

You will be able to select Aspect Ratio type of movie screen for playback.

| | |
|---|---|
| PanScan 4:3 | 16:9 Ratio converted to 4:3 Ratio is referred to as high definition TV. It will reduce scan lines to 4:3. |
| LetterBox 4:3 | 16:9 Ratio converted to 4:3 Ratio is referred to as your TV. It will decompress image to 4:3. |
| 16:9 | Video is fully displayed in 16:9 DVD frame as well as 4:3 Ratio fully displayed. |
| 16:10 | It enables you to add letterboxing bars above and below video screen, meanwhile, your TV maintains its aspect ratio of 16:9, e.g. 16:9=1920x1080 / 16:10=1920x1200. |

### Brightness

Brightness in video refers to the luminance portion of a video signal. It enables you to use Increase Brightness and Decrease Brightness commands by pressing [SET-UP] button on your remote during playback.

### Contrast

Allow you to adjust video contrast when using Increase Contrast and Decrease Contrast commands by pressing [SET-UP] button on your remote during playback.

### Hue

This option provides how to use the Hue adjustment to enhance your colors. Along the way, you will be able to use Increase Hue and Decrease Hue commands by pressing [SET-UP] button on your remote during playback.

### Saturation

This feature, saturation is one of three coordinates in the HSL and HSV color spaces. It enables you to use Increase Saturation and Decrease Saturation commands by pressing [SET-UP] button on your remote while playback.

FTP
WEB

**DHCP IP (AUTO)**

The Dynamic Host Configuration Protocol DHCP is a networking protocol used to automatically retrieve IP address assignments through Wired LAN. This feature is set as a default value so that IP address is automatically assigned by RJ45 connecting and rebooting. You need a network router in order to stream files from your PC.

※ IP address of DHCP IP may sometimes be unstable.

**STATIC IP (MANUAL)**

Static IP is a manual way of obtaining an IP address, and is used for an assigned IP address that does not change often that being so it will most likely receive the same IP address through Wired LAN. IP will be allocated by users when a fixed IP address is needed or DHCP server isn't available.

2011.1.10 14:48 IP: 192.168.123.53

### Menu Language

Default language is in English but the OSD menu language can be changed to your preferred language: select [Setting] – [System] – [Menu Language].

Xtreamer Media Players supports the following languages:
[1]Arabic [2]Thai [3] Hebrew [4]Vietnamese [5]Chinese [6]Japanese [7]Korean [8]Spanish [9]German [10]Italian [11]Turkish [12] Greek [13] Dutch [14] French [15]Latvian [16]Russian [17]Croatian [18]Portuguese [19]Swedish [20]Polish [21]Romanian [22]Ukrainian [23]English [24]Magyar [25]Czech [26] Slovene [27]Finnish [28]Danish [29] Estonian [30]Hungarian.

### Power Mode

The feature supports "Power Mode" settings by pressing [POWER] button on your remote.

| | |
|---|---|
| **Power Off** | Select to switch off the power. |
| **NAS Mode** | Speed and stability of stream are improved by optimizing its function of network application as setting off PLAYER mode internally. The allotted memory for PLAYER function is set to Off mode which enables the system to reserve 90 percent of the memory for NAS Mode. |
| **Confirm Window** | By pressing [POWER] button, Confirm Window is displayed to select between [Power OFF] and [NAS Mode]. |

### Firmware Update

The feature displays the current firmware version. It also enables you to update firmware by selecting stored firmware file from HDD or USB storage device. After the upgrade procedure is complete the system will reboot.

### Lock System

This option allows you to assign a password to your system folders in order to protect your content. The Locked folders will be accessible by password only.

## System

2011.1.10 14:14 IP: 192.168.123.53

### Screen Saver

This is to set the time for automatic changing images on your screen during periods of user inactivity. Screensaver is designed to prevent phosphor burn-in on the LCD TV when the properties of the exposed areas of phosphor-coating on the inside of the screen gradually and permanently change, eventually leading to ghost image on the screen.
[Off / 1 Minutes / 5 Minutes / 15 Minutes / 30 Minutes / 45 Minutes]

### Fan Speed

You can adjust player fan speed by choosing the following options: [Low / Medium / High / Manual]
If you player has a passive cooling solution you can switch the fan off.
By switching to NAS Mode in which additional setting values are automatically stored.

### HDD Format

This feature supports internal HDD format function. Formatted file system is divided into Linux Swap partition and NTFS partition. By auto formatting, Linux swap partition is an independent section of hard disk used solely for swapping. The swap space is the amount of virtual memory available.

### Restore defaults

This option restores your player to the factory defaults. It will clear all the personal settings including passwords, favorites, custom skins etc.
- Using this option will not damage the data on your HDD
- Always reset your settings after a firmware upgrade

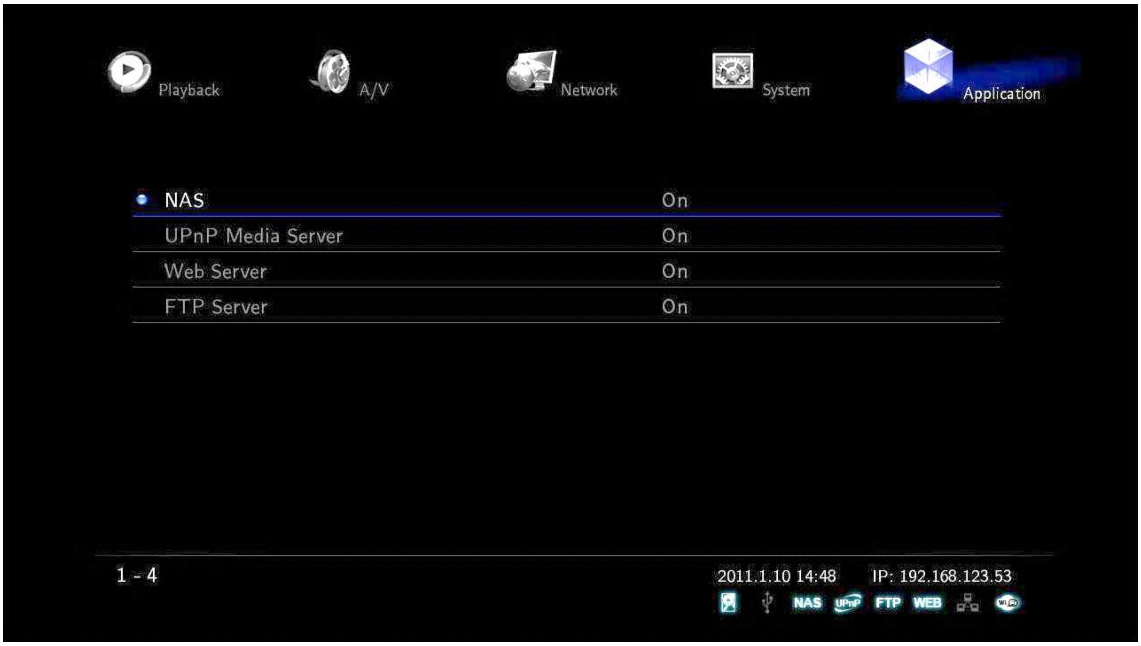
### The Usage of Network Drive



NAS On
UPnP Media Server On
Web Server On
FTP Server On

**NAS Network Drive(SAMBA)**
Allows you to use your player as a NAS device on your network.
NAS network drive provides storing and copying files services.

**UPnP Media Server**
You will be able to set up “UPnP Media Server” in order to improve optimizing its function of network application, and playback function is connected to “UPnP AV Media Server” such as Tversity, PS3 Media Server and XBMC Media Center. This feature supports UPnP Media Server and NFS client functions.

**Web Server**
It enables you to set up “Web Server” in order to optimize the player's network applications. The web server allows uploading and downloading files from iXtreamer and gives you an ability to control your player via virtual (Web) remote control application.

**FTP Server**
You will be able to set up “FTP Server” in order to improve optimizing its function of network application. Xtreamer has a built-in FTP service that you will be able to manage and copy files to and from it through FTP connection.

**Note**
If an option is not frequently used we recommend disabling it to reserve the memory and for security reasons.

**What’s the UPnP?**
Universal Plug and Play “UPnP” is a set of networking protocols. The UPnP architecture allows peer-to-peer networking of PCs, networked home appliances and wireless devices. It is a distributed, open architecture protocol based on established standards such as TCP/IP, UDP, HTTP, XML, and SOAP. The goals of UPnP are to allow devices to connect seamlessly and to simplify the implementation of networks in the home. UPnP achieves this by defining and publishing UPnP device control protocols DCP built upon open, Internet-based communication standards.

## Viewing JukeBox information in Media Library

Avatar (2009)

Jake Sully (Sam Worthington), a paraplegic former Marine finds a new life on the distant planet of Pandora. Only to find himself battling humankind alongside the planet's indigenous Na'vi race as one of their own. Zoe Saldana, Joel Moore, Stephen Lang, and Sigourney Weaver co-star in this ambitious digital 3D sci-fi epic from Academy Award-winning Titanic director James Cameron.

DIRECTOR James Cameron
ACTORS Sam Worthington, Zoe Saldana, Stephen Lang, Sigourney Weaver, Michelle Rodriguez, Joel Moore, Giovanni Ribisi, CCH Pounder, Laz

**Tip**

**How to use its specialized function of playback**

Thumbnail View function; Thumbnails are reduced-size versions of pictures, used solely for “Photos” menu by pressing [PREVIEW] button which means you will not be able to use the function in “ALL/Movies/Music” menu. “MUSIC” mode; all the music are automatically played in order. “All” modes, on the other hand, doesn’t support automatic playback so ID3Tag and Cover-art Photos are not changed. You will enjoy its specialized function of playback such as MUSIC, PHOTOS and MOVIES mode.

## If no hard disk installed

### 1. Xtreamer Live Introduction

Xtreamer is a FLV capable device. It allows you to watch live streaming content from hundreds web publishers such as CNN, ESPN, various music, gaming and technology channels and more on your TV. Xtreamer also enables you to enjoy “YouTube” FLV files right away without using your PC by bringing them straight to your living room

You can also add your own favorite feeds and channels or enjoy a vast selection of custom internet content collected by the Xtreamer community. For more information please visit our official forum at: [http://forum.xtreamer.net](http://forum.xtreamer.net)

**File-manager for practical use**
iXtreamer has a built in file-manager that allows you to easily copy files to and from any USB attached drive; Digital Camera, MP3 Player, and Mobile Phone, to Xtreamer internal HDD without the need to use PC to accomplish that. You will even be able to back up simply using your remote control.

## Web Server

### 1. Initial Setting for Web Server connection

In order to use “Web Server” iXtreamer needs to be connected to a computer via network

1. Firstly, check the player IP.
2. Confirm the allocated IP and then setup [System] - [UPnP Media Server] - [On].
3. Enter the allocated IP address of Xtreamer in URL address bar. The PC and Xtreamer need to be the same local network.

| Login | Set up ID and PWD to access web-server. |
| DDNS | -It allows you to access your Xtreamer over the Internet from everywhere in the world. Simply type ***.myxtreamer.net in your browser.<br>- The Xtreamer DDNS service is free |
| HTTP | - It changes HTTP Port (Default Value: 80).<br>- It changes HTTP Port if 80 Port isn’t supported, e.g. 8080.<br>- For instance, the case of Korea, if you access from external, you need to change 80 port due to it is blocked by Korea communication service. (Please make sure to open\forward a relevant port on your router). |
| FTP | It changes FTP connection port number (Default value : 21). |
| Live | - It provides adding user specified RSS address when you use Xtreamer Live.<br>- Web port default value must be 80.<br>- Live keyword: This button enables you to connect “make” button on Xtreamer key board input screen.<br>- If you use keyword function, you can enter and search in multi-languages. |
| Backup/Restore | It saves or restores UPnP setting value. |
| Language | It changes language for UPnP media server. |
| NAS Mode | It blocks TV output from Xtreamer so that more stable network environment can be provided. |
| NFS Client | It mounts NFS File System. Generally, it enables you to use the file system only for NAS Server product by mounting. |
| Workgroup/Hostname | It changes Network Group, and hostname of Xtreamer in Network.<br>(Default Value : myxtreamer) |
| TV Skin | It changes or restores GUI skin. |

## Web Server

### 3 How to use “Web GUI File Manager” of Web Server

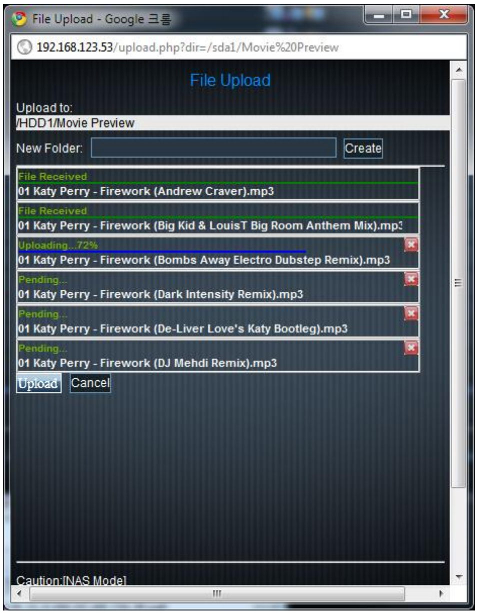
Archive

| Menu | Description |
|---|---|
| Video | To view video files only. |
| Audio | To view audio files. |
| Photos | To view photos files. |
| All | To display all files. |
| Mylist | It provides managing personal playlist i.e. Mylist, [Media Library] – [Mylist]. |
| Upload | Allows you to upload one or several files. |
| File Manager | It enables you to create new folders, change names, copy, move, and delete files. |

**Note:** Please note that the remote downloading via web server only depends on your home network upload speed.

## Web Server

### 4 How to “File Upload & File Download”



File Upload - Google 크롬

192.168.123.53/upload.php?dir=/sda1/Movie%20Preview

File Upload

Upload to:
/HDD1/Movie Preview

New Folder:

File Received
01 Katy Perry - Firework (Andrew Craver).mp3

File Received
01 Katy Perry - Firework (Big Kid & LouisT Big Room Anthem Mix).mp3

Uploading...72%
01 Katy Perry - Firework (Bombs Away Electro Dubstep Remix).mp3

Pending...
01 Katy Perry - Firework (Dark Intensity Remix).mp3

Pending...
01 Katy Perry - Firework (De-Liver Love's Katy Bootleg).mp3

Pending...
01 Katy Perry - Firework (DJ Mehdi Remix).mp3

Caution:[NAS Mode]

### How to Upload to Web Server

1. If you click [Upload] button, window will be popped up (refer to the next image), and then add up files here.

2. Click [Upload] button leads to automatic uploading. (Uploading in excess of 2GB is impossible due to capacity limitation of web browser)

3. The list of uploaded files will disappear when the upload is finished.

File Download

Do you want to open or save this file?

Name: mvix_icon.gif
Type: GIF Image
From: 192.168.123.55

While files from the Internet can be useful, some files can potentially harm your computer. If you do not trust the source, do not open or save this file. What's the risk?

### How to download files

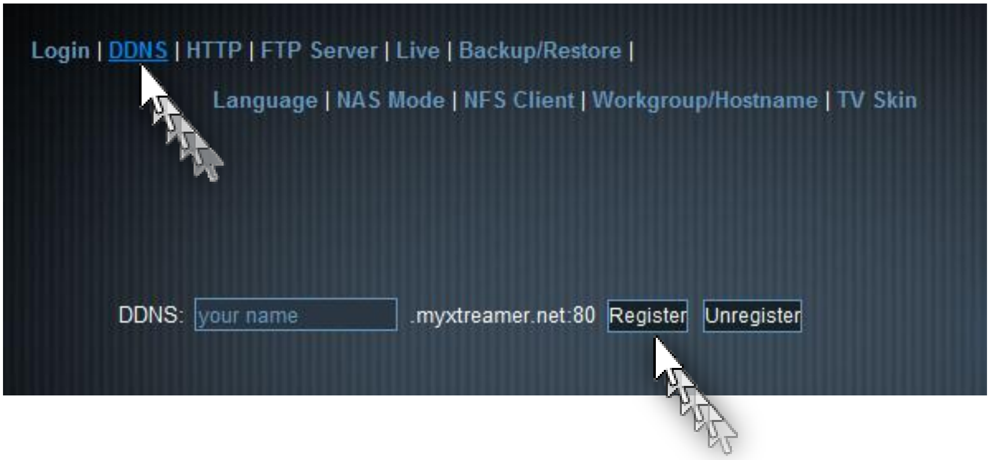
1. Click on the file you want to download via UPnP.

2. We’d recommend to use the latest version of UPnP web browser which provides a connection link in order to run GOM/VLC/WMP Player properly.

## Web Server media server

### Setting up DDNS service

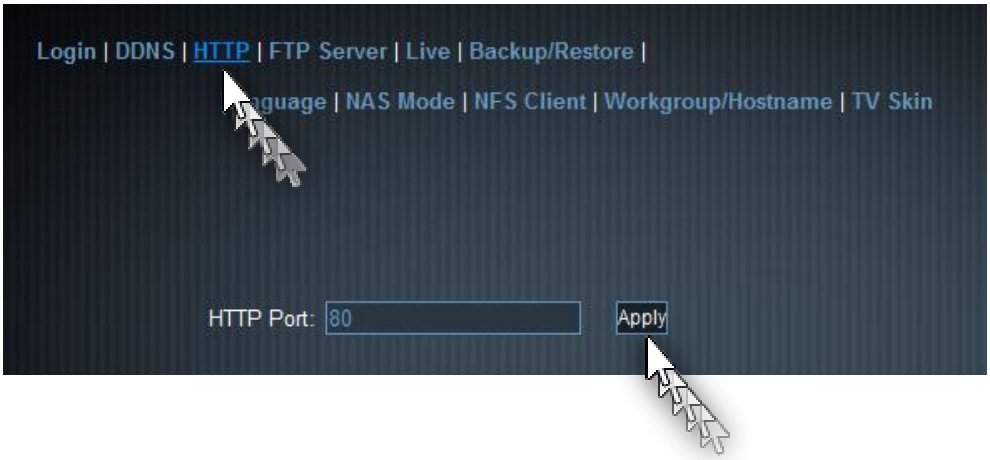
Turn on Web server from application function.
Access to Web server via Web browser. Click Web server
□ Setup □ DDNS on the menu



Login | DDNS | HTTP | FTP Server | Live | Backup/Restore |
Language | NAS Mode | NFS Client | Workgroup/Hostname | TV Skin
Register
Unregister

DDNS: your name .myxtreamer.net:80

Insert your preffered URL name to the DDNS box.
You can only use the names that are not already registered.



Login | DDNS | HTTP | FTP Server | Live | Backup/Restore |
guage | NAS Mode | NFS Client | Workgroup/Hostname | TV Skin
Apply

HTTP Port: 80

**The default port designated to the DDNS service is 80. If port 80 is used or restricted you can use 8080.**

After applying insert URL ex) http://192.168.0.100:8080 so you will be able to access to Web server (Supposition IP : 192.168.0.100 , Supposition Port : 8080)

You will need to use port forwarding ( Virtual Server ) on your router to provide access and always use the correct port when accessing your iXtreamer over the Internet

In order to initialize, follow Xtreamer output screen(TV) → Setting → System → setting initialization
Port number and web server password will be initialized to basic setting.

## Usage of NAS (Network Attached Storage)

If you want to use Network Drive, your network should be connected with the same PC.

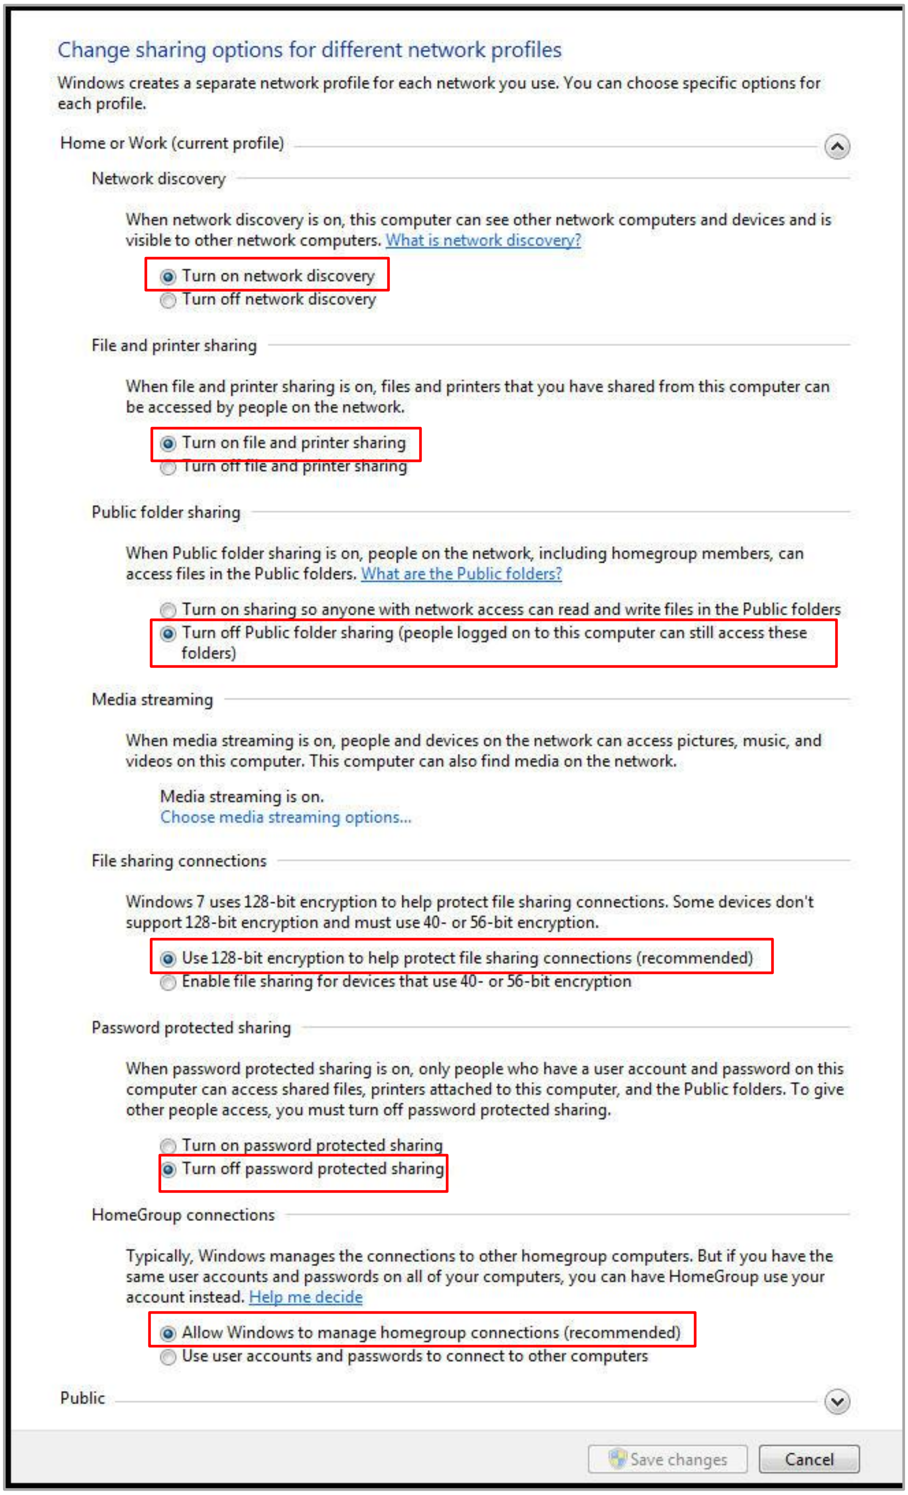
Access files and printers located on other network computers, or change sharing settings.

2. Click [Change advanced sharing settings] on the right side of the screen after appearing Network and Sharing Centre.

## How to set-up Folder Sharing in Windows 7



Change sharing options for different network profiles

Windows creates a separate network profile for each network you use. You can choose specific options for each profile.

Home or Work (current profile)

Network discovery

When network discovery is on, this computer can see other network computers and devices and is visible to other network computers. What is network discovery?

● Turn on network discovery
○ Turn off network discovery

File and printer sharing

When file and printer sharing is on, files and printers that you have shared from this computer can be accessed by people on the network.

● Turn on file and printer sharing
○ Turn off file and printer sharing

Public folder sharing

When Public folder sharing is on, people on the network, including homegroup members, can access files in the Public folders. What are the Public folders?

○ Turn on sharing so anyone with network access can read and write files in the Public folders
● Turn off Public folder sharing (people logged on to this computer can still access these folders)

Media streaming

When media streaming is on, people and devices on the network can access pictures, music, and videos on this computer. This computer can also find media on the network.

Media streaming is on.
Choose media streaming options...

File sharing connections

Windows 7 uses 128-bit encryption to help protect file sharing connections. Some devices don't support 128-bit encryption and must use 40- or 56-bit encryption.

● Use 128-bit encryption to help protect file sharing connections (recommended)
○ Enable file sharing for devices that use 40- or 56-bit encryption

Password protected sharing

When password protected sharing is on, only people who have a user account and password on this computer can access shared files, printers attached to this computer, and the Public folders. To give other people access, you must turn off password protected sharing.

○ Turn on password protected sharing
● Turn off password protected sharing

HomeGroup connections

Typically, Windows manages the connections to other homegroup computers. But if you have the same user accounts and passwords on all of your computers, you can have HomeGroup use your account instead. Help me decide

● Allow Windows to manage homegroup connections (recommended)
○ Use user accounts and passwords to connect to other computers

Public

3. Change sharing options (refer to the above image).
   The sharing option needs to be applied in your home or company (Current Profile).

## If folder accessing in window XP isn't available.

The instruction is subject to there isn't any problem in IP, Network Workgroup, Computer's name, and so on. You, therefore, need to check Security set up part.

Note:
This instruction will be able to have effect on changing value, registry key correction in system, hence, you must not change other set value, incorrect setting value will be able to cause serious damage to your system].

1. Click [Start] – [Control Panel] - [Administrative Tools] [Local Security Policy] – [User Rights Assignment].
    1-1. Everyone, Users and Guest must be included in "Access this computer from network".
    1-2. Add Everyone, Users and Guest if there is missing one in there.
    1-3. If there are Everyone, Users and Guest in "Deny Access to this computer form the network", delete 3 of these accounts.
    1-4. Users and Guest must be included in "Log on locally".
    1-5. Users and Guest must not be included in "Deny log on locally".
    1-6. everyone and Users must be included in "By pass traverse checking".

2. Click [Start] – [Control Panel] –[Administrative Tools] – [Local Security Policy] – [Security Option].
    2-1. Network Security: [Send LM & NTCM responses] in "Authentication Level".
    2-2. Network Access : [Disabled] in "Don't allow anonymous enumeration of SAM accounts and shares".

3. Click [Start] – [Control Panel] – [Firewall].
    3-1. Check on [File and Printer Sharing] in "Exception" tap menu.

4. Click [Start] – [Control Panel] – [Administrative Tools] – [Services].
    4-1. Computer Browser: [Started in Status ] - [Automatic in Startup type].
    4-2. Server: [Started in Status ] – [Automatic in Startup type].
    4-3. Workstation: [Status Started] – [Startup type Automatic].

5. Click [Start] – [Run] and type [regedit] then click [OK].
    5-1 [HKEY_LOCAL_MACHINE] – [SYSTEM] – [Current Control Set] – [Control] –[Lsarestrictanonymous]
    "Lsarestrictanonymous" Value must be [0]. If there is no item, which means the value is the same as "0".

6. Once completed, you should reboot your computer so that setting value can be applied.

As starting Windows, enter ID and PWD into pop-up window for Network User's. If you don't use PWD, enter [guest] in the ID Section, leave the PWD section blank. Once entered, save ID and PWD by pressing [OK].

## You can't access a share on your network

The main reason that you cannot access a network share is that a GUEST account is not enabled on your system.

## How to display “Guest” account “on” for Windows

For Windows XP,
(1) Select [Start] – [Control Panel] - [User accounts]
(2) Change from [Guest accounts is off] to [Guest accounts is on]

For Windows Vista,
(1) Select [Start] – [Control Panel] – [User accounts] – [Manage another account]
(2) Click [Guest]
(3) Change from [Guest accounts is off] to [Turn on]

Reboot PC and Xtreamer, then you will be able to connect Network.

| iPod operation | | Green blink | | Green blink |
| Connect iPod | | Green lighting | | Green lighting |
| Disconnect iPod | | Off | | Blue lighting |
| Complete Booting | | | Blue lighting | |

# Troubleshooting

**Recovery Procedure**

The following is a structured list of steps you can take to solve various issues with your iXtreamer.

**NOTE: You need a USB-stick to do firmware upgrades. We recommend to use a stick no bigger then 2GB. Make sure the stick is formatted to FAT32.**

1) Disconnect power cable from the iXtreamer for 30 minutes
2) Disconnect internal and external hard drives from the iXtreamer;
3) Disconnect USB devices from the iXtreamer including WIFI antenna;
4) Disconnected HDMI cables from the iXtreamer;
5) Connect the iXtreamer to your TV via the composite (red/white/yellow - RCA) cables;
6) Make sure your iXtreamer is turned off;
7) Install the latest iXtreamer emergency firmware;
8) Turn off your iXtreamer and remove power cable. Leave the power off for 5 minutes;

*It might be necessary to run the procedure a couple of times and\or use an different USB stick*

**Emergency firmware procedure:**

In case your player would crash and stops responding to your remote's commands and you need to remove the power cord to restart, it could have problems with restarting or will not start at all. You could also face other issues that can only be solved by installing the emergency firmware.

The installation procedure is as follows: -

(1) Download and Un-zip/Extract the emergency *.img file
(2) Copy the *.img file to the root of the USB2 pen-drive or to HDD inside the Xtreamer (i.e.: not inside a folder).
(3) Disconnect the iXtreamer's power supply. Wait for a few minutes. Reconnect the power supply.
(4) Using the Remote control, press "Home" and release, press "3" and release, press "Power" and release.

The emergency upgrade process should be visible on your screen if performed correctly.

**My iXtreamer doesn't start – no red LED on the player.**

Please check that the power cord is plugged in.

**Orange LED is blinking – iXtreamer stuck on the splash screen**

Unplug the player for a few minutes and then try again.
It might be necessary to run the emergency firmware installation.

**Can't see anything on the TV screen**

Check all the connections and cycle through various TVOUT options on your remote. You should also check if your TV has different input options.

# Troubleshooting

**Can't upgrade the firmware – after a reboot iXtreamer is stuck on the splash screen**

Connect your player to a TV via RCA cables and try the procedure again.

**Resetting iXtreamer to factory defaults**

Please make sure to reset your player to factory defaults via [SETTING] – [SYSTEM] menu after each firmware upgrade. That will help you to avoid many possible issues.

**iXtreamer looses wireless connection, playback over wireless is less than perfect.**

To improve your wireless connectivity and performance you can:

* Use router channels 1 or 11.
* Setup 20 MHz channel width.
* Switch router wireless Band to 2.4 GHz

Using a short USB extension cable is a great way to improve the signal strength.

**iXtreamer cannot play a video file**

Not all video files are encoded to work with the iXtreamer. That depends on the encoding of the media or can happen due to a corrupted download. Being able to play a file on your PC does not necessarily mean that the iXtreamer media player will be able to play back the same file flawlessly. In case of a problem please contact the iXtreamer support staff.

**I can't find information I'm looking for in this guide**

Media player development is a very dynamic field and every firmware update brings new features and improvements. If you cannot find a desired information in this guide please visit our Knowledge base. Xtreamer official forum is a large and vibrant community where people from all over the world come together to discuss various Xtreamer products. It's full of friendly and helpful people and is a great place for an Xtreamer enthusiast. Please register and join the community.
You can also contact the Xtreamer stuff via the Shop site or e-mail.
